Hello,

I'd like to take this opportunity to invite you to the 2025 Roster Charolais Sale. The bulls are looking good and we are very proud to present them for your appraisal.

It's a certainty that you are enjoying a cattle market like we've never seen before. It pays to hang in there sometimes. I'm not going to tell you that it will never end. Or that you could see it better yet. I just know that whatever happens, quality and efficiency always pay the best.

We feel like our program is on par with any you could choose, and we are grateful for those who continue to choose our bulls.

Please contact me with any questions you might have, and I hope we see you on the 4th.

Mike

HERDSMAN:

Jose Hernadez

What will you see when you look at a Roster Charolais Bull?

Our Herd bulls will be long made, deep bodied, and well muscled. Good headed with structural correctness and an emphasis on sound feet and legs. Fertility and libido are, of course, what makes the whole process work. They are equally important. Quiet disposition translates into less headaches and more potential profit, so every herd bull we have is easy to handle and quiet.

The bulls are available for viewing at the farm
There are also many photos and videos on our webpage

All the bulls in this sale were on test in the same group for 150 days. They were fed a medium megacal developer ration. The feed program is not designed for maximum gain in a short period but for the long term welfare and longevity of the bull. We have received many positive comments over the years about how well the bulls hold up for our customers. We are convinced this is a better way to develop our bulls instead of trying to see how big or heavy we can make them. Our philosophy is to offer bulls with adequate growth in a crossbreeding situation. We feel that **every** bull in the sale meets this criteria.

All the bulls in this sale have been tested negative for persistent infection (PI) of BVD.

Many of our customers have us take the bulls back to our place after the sale for later delivery. They are returned to the same pens and are put on the same ration. This helps in their continued development for breeding season especially on some of the younger bulls.
